

Currently  2 in 3  
of ALL HEAD & NECK cancers  
are **DIAGNOSED** at  
the **advanced** STAGE

OF these  
 will  
**not** be  
**ALIVE** after **5 YEARS**

Yet if **DIAGNOSED** and  
**treated early**  80 - 90 %  
in the **STAGES** will **SURVIVE**

**EARLIER DIAGNOSIS AND REFERRAL CAN  
IMPROVE PATIENT CHANCES OF SURVIVAL**
